Online diaries and blogs are ways to express yourself in writing, sharing your hopes, dreams and opinions with online audiences. If you choose to write an online diary or blog depends on what you like to share and how public you like your entries to be. We looked at both to help you choose the right online format for your reflections. The terms of blog and online diary are often used interchangeably, and sometimes the term online magazine gets thrown in. However, whether you consider your posts as part of a diary or blog post depends mainly on: The topic. Your desire for audience, advertising and community discussion. How your platform is placed. The term blog was coined in 1997 and was changed to a blog in 1999. Merriam-Webster announced the blog word of the year in 1994. With online diaries, people tend to write about their daily lives and experiences, including complaints, personal feelings, hopes and dreams. Writing a diary online can be a cleansing way of working through trauma or an important experience. Think about the content traditionally found in a writing magazine, except for putting it online for a wider audience. Ironically, someone can write about personal and intimate things that they don't want close friends and family to know, but post it online for everyone to see. For this reason, writers sometimes use a pseudonym to maintain privacy while keeping their online diary authentic, honest and raw. There are certain types of online diaries such as travel diaries and diet diaries. Blogs can be found on any topic imaginable, from personal experiences and politics to self-help topics and beyond, as long as the content is compelling. Readers' comments are often included in the blog. This creates a community-discussion feel. Blogs are often tools for advertising and marketing, get the following to help run or promote a book, product or business. Bloggers often actively seek to increase traffic on their blogs. Blogs have produced many subsignms such as mom blogs and political blogs. There's a lot of crossover between online diaries and blogs in terms of hosting. There are free hosting sites as well as paid sites that offer more customization and functionality. Online diaries are sometimes posted on a personal website that includes a homepage, biography, essay and photo album. LiveJournal is a popular online diary-hosting site where you can create a magazine for free, post entries, and participate in online communities. If you want advanced features, switch to a paid account. Penzu is another online diary site where you can keep a private diary and share posts with friends if you like, by email. Penzu has a mobile app if you want to update your diary frequently. Diary.com have both a public diary and a personal journal that is great for privacy. Blogs are sometimes part of a company or an individual website. For example, a motivational speaker may have a blog blog on their website along with a biography and a list of achievements. Many blogs are placed on blog-hosting sites. One popular blog-hosting site is Blogger, which offers free blog hosting and the opportunity to make money if you show ads. WordPress.com is the largest blogging community, offering free and easy-to-use blog functionality. WordPress.org is a paid upgrade to WordPress.com, offering more customization options on a fast and secure server. Is the online repository of your reflections an online diary or blog before you. Most importantly, gaining the courage to put yourself out there, anonymously or publicly, and share your thoughts, feelings and beliefs. If your subject is personal and intimate, the online diary format is likely best for you. If you want to create a public platform to share your ideas or business, a blog that you can publicly promote is the way to go. Either way, an online diary or blog can inspire others and give you a platform to tell your truth. Looking for blood? We really hope so because the fourth season of The Vampire Diaries premieres tonight - and the star of the show is none other than our super-fab November cover girl, Nina Dobrev.Photo Credit: Courtesy of CW We can't wait to see what's in store for TVD this season now that Dobrev's character, Elena, is moving into the vampire itself. We wonder if she will seek solace in Stephen, played by the smouldering Paul Wesley, or Damon, played by her real love, 33-year-old Ian Somerhalder.And while her relationship can be tumultuous with Somerhalder on screen, in real life, she has a relationship down pat. When it comes to finding someone special, the 23-year-old beauty has some wise advice in telling us: He should be a happy man. You will laugh and enjoy life more. Want advice from Nina? Check back for October 16 for more from our cover star, and be sure to get a magazine on newsstands October 23! The Vampire Diaries premieres tonight at 8pm EDT on the CW. If you don't have anything nice to say, don't say anything at all. Vampires still have their moment in Hollywood. Sure, True Blood last season on Us and Twilight premiered its fourth and final movie three years ago, but the CW's The Vampire Diaries will still be strong. And so it's a huge, loyal fandom - given that we've spent the last few months obsessed and simultaneously crying over the death of Damon Salvatore in the season 5 finale. Some TVD fans are so loyal that they even try to make Mystic Grill a real restaurant. Vampire overload may be over, but TVD is forever. And as TVD super-fans, we reserve the right to complain, trash talk, and subtweet everything we want about the vampire drama CW, because we're also the first to admit that showrunner Julie Plec disappointing woman. And what's wildly funny is how many times Jeremy Gilbert was killed and resurrected on the show. (We're rational beings, okay?) It's just really not good. non-fans are trying to come along and put their two cents into the conversation about whether Elena should end up with Stephen or Damon or none or tell us to stop crying about Damon's death (#RIP #NEVERFORGET) because he will obviously return. You don't know anything about our pain, so again, if you have nothing to say, keep it to yourself. With that being said, here are seven things you should never say to a fan of The Vampire Diaries in your life. Mainly because we DGAF about your opinion, but also because we can not be bothered to explain why we care, because we are already too busy discussing how Damon will come back to life - Vampires are so old. Really? You think so? Well, you're wrong. Why are you sad about Damon's death? Everything on this show always comes back to life. If I kill you, will you come back to life? If Elena Gilbert is crying, I'm sobbing. And while we all know that Ian Somerhalder is under contract for TVD Season 6, that doesn't make it any less difficult to see him die. He loves Elena, Elena loves him, their love has been the basis of this show like, three years. It's a hit-and-go. How many times has Jeremy Gilbert died? If you should know, Jeremy died five times. And that's all I can say about it. So it's a real blood knock-off. Really? You ask that since they are both based off a series of books as a feature of vampires, and both play relationship musical chairs? It can't be a knock-off if it's based off different source materials. Eye, hater. The actions on this show are awful. Have you ever seen this show? Nina Dobrev has played two different characters over the past three seasons and in Season 5, she played three different characters in the same scene. Just stop talking, please. You don't know anything. Do they shine like diamonds in the sun? It was Twilight - if you're going to ask me questions about vampires, at least get your facts straight. And if you're just trolling me, no, they don't shine like diamonds because it's not Rihanna's song. Delena or Stelen or Sterolin. It's a matter to avoid completely. TVD fans are all about their ships, and if you are on the wrong side or dare to say that delivering TV pairs is stupid and pointless, prepare to get your heart ripped. #sorrynotsorryImages: CW; Gifi; Rebloggia (2); lumenka, ianjosephsomerhalder/Tumblr; Degrassi/Wikia Obviously I still bemoan how dramatically the Secret Circle ended, just when I get addicted to all the potential storylines. At the time, sci-fi and superheroes were all people seemed to care about, and this little show about the coven of teenage witches, battling witch hunters, demons, their parents, and each other was a refreshing change of pace. The show has a lot to do with The Vampire Diaries, which went on to become a hit for the network, and I still occasionally wonder what might have happened if the two shows moved on. There are many related threads, including the general tone, tone, elements, and themes related to teenage angst. Not to mention one massive visual gathering: actress Phoebe Tonkin. She played the rebellious and self-centered Faye in The Secret Circle, and then moved on to The Vampire Diaries, and eventually to The Originals, as Haley's werewolf. The Secret Circle may have had its fair share of demonic possessions, phenomena and voodoo, but the addition of a few more different supernatural beings could have further increased its appeal. To further prove your point, here are seven ways the Secret Circle can easily fit into the world of Vampire Diaries. Witches already most of TVDAs Elena has been busy dealing with a vampire love triangle with Stefan and Damon. Bonnie has been realizing her witch origin. Since then, witches have become an integral part of the show, popping up to wreak havoc wherever they can. It wouldn't be a head-on to overcome this show with The Secret Circle, which is literally about covenant witches. Faye could have gotten pregnant with Klaus' ChildImagine if Faye had one to have a one-night stand with Klaus, conceive her child and move into the Originals' house in New Orleans for a spin-off. Faye's baby could have even greater consequences for the world: Half a million (equal parts vampire and werewolf) growing inside the witch's belly would've made the French quarter witches shake in their boots even more than they've already done. The plan to resurrect Silas could have been involved in Covenha Bonnie, who was manipulated by Professor Shane, who in turn, Silas manipulated to create a triangle of expression, the news of the death of an entire covenant witch could get into Chance Harbor. Or maybe Cassie and the gang could have been Bonnie's target.4 Bonnie could have popped up to chance HarborWhere had someone like Diana when Bonnie was freaking out because of her magical abilities? That is, before her grandmother stepped in to teach her a few things. If she had a group of witches the same age as her to go for magic advice, maybe she wouldn't have turned to expression.5 Chance Harbor witches could've helped with New Orleans WarIn this hypothetical crossover world, Faye is already in New Orleans for the original spin-off, which will be a key jumping point for many drama. Can you imagine what damage a witch of the French quarter could do to the Witches of Chance Harbor, especially if they thought Faye was held against her will?6 Elijah and Cassie would've gotten along, as Elijah, Cassie just wants peace, but she also has the darkness inside her that she constantly keeps under control. Presumably, they will see many things face to face, and if they fall in love, it will cause even more drama. Adam and Jake were jealous of Elijah, and Faye was mad at Cassie for driving in to steal her piece. Just imagine the drama!7. What was it Do during this break? There was a time when Jake left Chance Harbor after the witch hunters, who were associated with him, tried to kill Cassie. Luckily she lived, but Jake didn't attend part of the show until Cassie spells to bring him back. What was he doing? Where exactly did he go? Perhaps his adventures could take him to Mystic Falls, the epicenter of supernatural activity...
